**AGENT
MANUAL**

**ODD
SQUAD
LIVE!**

Find Your Badge Number

Figure Out Your Agent ID Number!

Odd Squad agents have a special number on their badges. The number comes from the letters in the agent's name. How does it work? Just follow these steps to find your own agent number.

Decode Your Name!

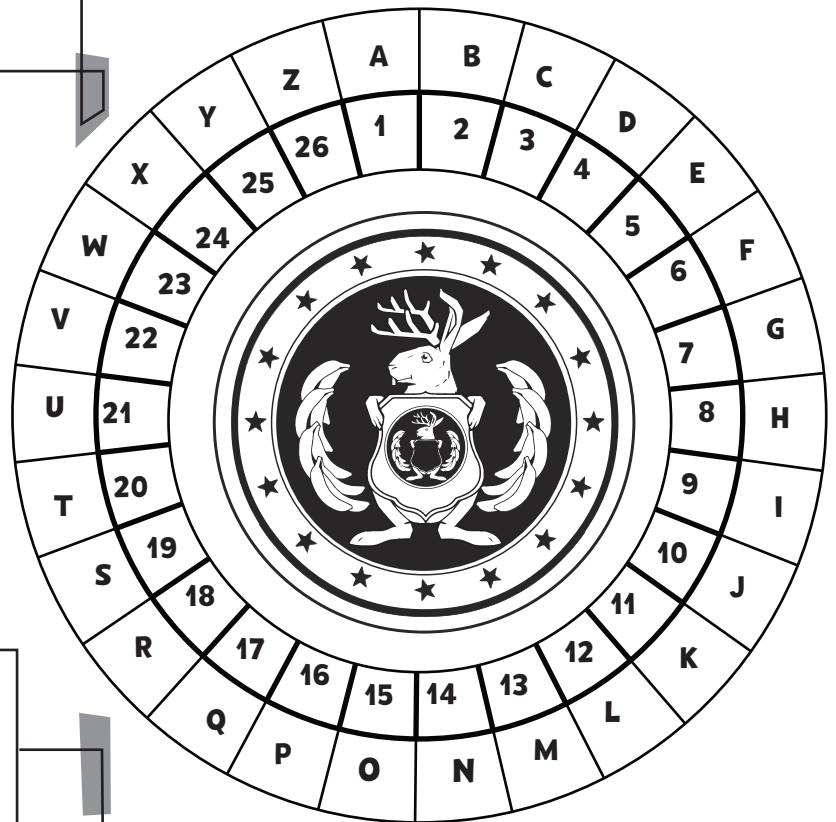

For example, if your name is Max, you would decode your name like this:

M = 13 A = 1 X = 24

Add Up the Numbers!

$$13 + 1 + 24 = 38$$

Max's badge number is **38**. To make it official, each agent would add the letter "O" to the front of his or her name, like this: Agent O'Max, #38.

Now do this for your name and join Odd Squad!

Make Your Own Blob

When a blob got loose in Odd Squad headquarters, it was a recipe for disaster! The chemical reaction between liquid starch and regular glue makes a mixture that splats, sticks, oozes, flops and stretches. Create your own slimy blob with with this fun activity!

ITEMS NEEDED

- A mixing bowl and spoon
- Liquid starch
- Food coloring
- Clear glue OR glitter glue

LET'S HAVE FUN!

1. In a large mixing bowl, add about 1/2 cup of clear glue (such as Elmer's glue). Note: You can use the regular, milk colored school glue, but the mixture will be less translucent and more opaque. We like how the slime looks using clear glue so we recommend that!
2. Add a generous amount of food coloring. The blob that got loose in Odd Squad headquarters was blue, but any color will do! Mix very well until the glue and the food coloring are well blended.
3. Add the liquid starch. Pour the starch very slowly, adding just enough until a slime forms. Keep adding small amounts until the mixture you stir is slimy and gloppy.
4. Another option to make this slime? Use glitter glue instead of clear glue and food coloring. Simply repeat the above steps, but add the liquid starch directly to the 1/2 cup of glitter glue (in whatever color) and stir until you've created your own slimy blob!
